Seeds Search

Plants have clever ways to spread their seeds/spores/pollen. Can you find them all? Tick them off as you go. Can you see others?

A collection of botanical illustrations arranged in a circle, each with a label and a corresponding white circle for marking. The items include: Oak acorn, Pine cone, Common lime peduncle, Cedar cone, Cypress pine-like cone, Chestnut burr konker, Dandelion flower, Mushroom, Sycamore helicopter seed, and Rose achenes rosehip. The page also contains several text prompts: 'Throw in the air, does it spin like a helicopter?' near the Sycamore helicopter seed; 'These use wind to spread.. How far can you blow the seeds?' near the Dandelion flower; and 'These come in many sizes and colours. How many can you find?' at the bottom.

Oak acorn

Pine cone

Common lime peduncle

Rose achenes rosehip

Cedar cone

Cypress pine-like cone

Chestnut burr konker

Mushroom

Dandelion flower

Sycamore helicopter seed

Throw in the air, does it spin like a helicopter?

These use wind to spread.. How far can you blow the seeds?

These come in many sizes and colours. How many can you find?
